

LEGIONAR 81.70

Legionar Series Winches, in addition to an attractive and modern design, offer high performance and exceptional durability. Thanks to the carbon clutch with doubled surface area, the service life is extremely high. SKF bearings and wear-resistant steel make the Legionar the best choice you can make for your forest work. The compacted steel cable is included with all machines, as are the mid-shield pulley and hitch. Completing the machine are the storage compartment, two chainstay compartments, a chainsaw holder, and for the larger models tank holder and work lights.
