

A red tractor with a yellow boom saw attachment is shown in a field. The tractor has "MANCOCK CONTRACTORS" written on the roof of the cab. The boom saw has three circular saw blades. A green curved line is visible in the upper right portion of the image. A green rectangular box is overlaid on the bottom left, containing the text "AgriQuip Sawblade Brochure".

AgriQuip Sawblade

Make your arm mower work harder and earn more with this work-hungry sawblade attachment mounted simply to the head mounting four bolts.

This unit clips on simply in replacement of the standard flail head. Power is transmitted from the HD cast iron motor through belts kept tight with tensioners via a replaceable coupling and onto the 3 x 800mm saws. Maintenance is thought of in the top two saws with tungsten teeth and the lower saw with plain teeth. These units are easily attached to most mounting systems.
