

Woodsplitters Brochure

Hydrasplitter Three Point Linkage (TPL)

For larger tractors the AgriQuip three point linkage mounted Hydrasplitter puts hydraulic power into use with unrivaled force. These splitters feature a simple, easy to use control valve with a convenient detent to return the ram quickly - ready for the next operation.

Hydrasplitter TPL	
Dimensions (mm)	1700 L x 880 W x 540 H
Stroke Time In*	3 Seconds
Stroke Time Out*	3 Seconds
Ram Size	80mm
Weight	120 kg
Max Log Diameter	400 mm
Capacity	Approx 3m ³ /hour

*Time may vary depending on flow of tractor hydraulics

Hydrasplitter Three Point Linkage Vertical (VTL)

These splitters feature a simple, easy to use control valve with a convenient detent to return the ram quickly - ready for the next operation. The VTL can be used from a position sitting on the ground, to a point anywhere in the range of the tractors draft arm lit range, to suit any operator.

The super muscle machine, with the following features:

- The control valve is simple and easy to use, with convenient detent feature for auto cylinder retract, allowing hands free to shift wood etc.
- The large sized, heavy plate table means that wood after being split doesn't fall off easily.
- The rugged construction means many years of trouble free use in commercial operation. A proven design of over 10 years in the market.

Hydrasplitter TPL	
Dimensions (mm)	1650 H x 1200 W x 900 D
Weight	220 kg approx
Table Area	1200 W x 700 D
Hydraulic Cylinder Bore	80mm
Hydraulic Cylinder Stroke	400mm
Axe Head Support Rollers	3
Splitting Force	Approx 23 Tonnes
